Distribution Example 10

DISH Pro Plus 44 Switch with Diplexers and Two Dual-Tuner Receivers with Agile Modulated Outputs

- The DP Plus 44 Power Inserter must be connected to the “To Power Inserter” Port 1.
- Diplexers must not be installed between the Power Inserter and the switch.
- Use 2150 MHz RG6 cable between the LNBF and the satellite inputs of the receiver.
- Use drip loops to direct water away from F-connectors.
- Ground in accordance with national and local electrical codes.
- Your installation may vary depending upon the losses in your system. Line amplification may be required. Ensure all components in the system operate within manufacturer specifications/ratings.

1. Diplexers must be DISH Pro compliant.
2. Can be a SuperDISH to support an alternate SuperDISH location.
3. For indoor use only.
